Herve Nkurikiyimfura

Senior Frontend Engineer

Montréal, QC | herveranik@gmail.com | +1 (438) 622-0733 | herveranik.com | github.com/hervera

Summary

Senior Frontend Engineer with 8+ years of experience building high-quality, scalable interfaces using React, Next.js, TypeScript, and modern UI engineering practices. Strong background in UI/UX design with Figma, design systems, reusable component architectures, performance optimization, accessibility, CI/CD, and monorepo workflows.

Core Skills

Frontend: React, TypeScript, Next.js, Vue.js, React Native, HTML5, SASS, CSS3

Testing: Jest, React Testing Library, Cypress, Playwright

Backend (Supporting): Node.js, Express, REST, GraphQL, Java Spring Boot, Python, FastAPI

Cloud & DevOps: Git, GitHub Actions, Docker, CI/CD pipelines, AWS

Design: Figma, FigJam, Design Systems, Accessibility (WCAG)

Databases: PostgreSQL, MySQL, MongoDB, Redis

GenAI: LLM-based coding assistants, prompt-driven development workflows

Highlights of Qualifications

- Bilingual: Fluent in English and French
- Strong analytical and problem-solving skills
- Excellent written and verbal communication
- Extensive experience collaborating with designers, PMs, and backend engineers
- Proven ability to lead frontend architecture decisions and code quality standards
- Experienced working in Agile/Scrum environments

Professional Experience

Frontend UX Developer **Jan 2024 – Dec 2025**
SIA Innovations Inc — Montréal, Canada (On-site)

- Design and implement scalable, accessible, and production-ready UI using React, Next.js, TypeScript, Redux, and SASS.
- Build reusable components and UI patterns aligned with the Carbon Design System.
- Lead frontend architecture improvements focusing on maintainability, performance, and clean component structures.
- Collaborate with cross-functional teams to refine user flows, improve usability, and ensure consistent, high-quality user experiences.
- Design, implement, and manage containerized deployments using Docker and Kubernetes.

Frontend Engineer **Jun 2021 – Dec 2023**
Pindo Ltd — Kigali, Rwanda (Remote)

- Developed complex, production-grade web applications using React, Next.js, Node.js, and TypeScript within a Turborepo monorepo setup.
- Designed and maintained reusable UI components documented and tested in Storybook.
- Integrated frontend applications with REST and GraphQL APIs, ensuring performance and reliability.
- Wrote unit and integration tests to ensure product quality and long-term stability.
- Worked in a code-review-driven Agile environment.

Full-Stack Software Engineer **Jan 2020 – Jul 2021**
Keyring Inc — Seattle, United States (Remote)

- Built and maintained high-performance full-stack web, mobile, and browser extension applications using React, Node.js, React Native, PostgreSQL and Firebase.
- Designed REST APIs and backend services, integrating secure third-party payment platforms (Stripe, PayPal, Affirm).
- Developed a React-based Chrome Extension enabling streaming access with a focus on performance and scalability.
- Designed Firebase backends with Firestore data models, real-time updates, notifications, and authentication.
- Built and deployed React Native mobile applications via Apple TestFlight with CI/CD pipelines.

Associate Software Engineer **May 2019 – Apr 2020**
Andela Ltd — Kigali, Rwanda (On-site)

- Developed full-stack features using React, Node.js, PostgreSQL, MongoDB, and Redis.
- Designed and implemented UI/UX for internal platforms using Angular.
- Integrated Slack APIs to automate workflows and improve operational efficiency.
- Contributed to testing, documentation, and Agile engineering best practices.

Web Developer **Oct 2017 – Apr 2019**
BICT Ltd — Kigali, Rwanda (On-site)

- Built multiple web platforms using HTML5, CSS, JavaScript, PHP, Laravel, and MySQL.
- Delivered end-to-end web solutions for NGOs and local organizations.
- Provided training to high school graduates in frontend web development.

Education

Bachelor in Computer Software Engineering **2018**
University of Rwanda
